Education

Indian Institute of Information Technology, Gwalior

Expected May 2026

Integrated Bachelors and Masters in Information Technology

CGPA: 8.02

Relevant Coursework

- Data Structures and Algorithms
- Object Oriented Programming
- Database Management System
- Operating System
- Computer Networks

Experience

Software Development Intern

May 2024 – Present

Kinetic Codes | [Homepage](#) | Software Development | 100+ Clients

Allahabad, India; Remote

- Crafted **user interface pages** precisely aligned with **Figma wireframes**, leveraging **MUI** and **Tailwind** for intuitive user experiences and seamless design integration.
- Established a **secure** and **efficient** routing system using **React Router**, ensuring enhanced **data protection**.
- Integrated **REST APIs** via **Axios**, boosting data retrieval efficiency by **30%** for **dynamic content updates**.
- Employed **Redux** for streamlined **state management**, reducing application complexity by **20%**.
- Implemented **React Suspense** and **lazy loading strategies**, cutting initial load times by **40%** to enhance overall application performance and user satisfaction.

Full Stack Intern

May – July 2023

AndWeMet | [Homepage](#) | Online Matchmaking Service | 5k+ Users

Noida, India; Remote

- Enhanced **MongoDB query performance** by optimizing indexing and query structures, resulting in a **30% improvement** in response times.
- Integrated **optimized queries** into the **frontend** using **Axios**, ensuring seamless **user interactions**.
- Developed **RESTful APIs** in **Node.js** and **Express** to support **frontend functionalities**, meeting **project requirements** and enhancing **application scalability**.
- Collaborated on **UI/UX design** in **Figma**, translating **requirements** into **mockups** to align with **functional** and **aesthetic goals**, ensuring a cohesive **user experience**.

Technical Skills

Languages: JavaScript, C/C++, Python, HTML/CSS

Frameworks and Libraries: Node.js, Express.js, React.js, Redux, Tailwind, MaterialUI

Databases: MongoDB, SQL

Other Technologies: REST API, Git & Github

Projects

Budget Management Website | *React.js, Redux, React Router, Node.js, AI/ML, Figma*

May 2024

- Crafted a **financial management platform** for an organization, empowering users to **create budgets** and **input expenses**, resulting in a **40 %** enhancement in financial efficiency.
- Enhanced financial planning accuracy with daily expense forecasting using **Facebook Prophet**.
- Optimized performance and streamlined organizational operations through a **role-based access model**.
- Achieved a **20%** reduction in security incidents by implementing robust security with protected routing and JWT tokens.

SnapThoughts - Insightful Thoughts Hub | *React.js, Redux, Figma, Netlify*

March 2023

- Developed a dynamic **Blogging Website** featuring user-generated content, interactive profiles, and comment sections.
- Implemented responsive **CSS styling** to enhance user experience, including custom fonts, colors, and layout design.
- Enhanced user engagement, resulting in a **20%** increase in interaction through blog creation, personal reflections, and feedback mechanisms.

Achievements

- Earned 1st Place in the **Techfest Domain in Webkriti Month 2022** at IIITM Gwalior, with a participation of **50+ teams**.
- Instructed and guided more than **200+ students** within the institute about Web Development.

Positions of Responsibility

- **Member** of Human's of Gwalior at **Rotaract Club**, of IIITM Gwalior
